

## **Sensity Declares COVID-19 Outbreak in Welland**

**Jan. 14, 2022:** Sensity is declaring an outbreak at its Welland Supported Independent Living Program.

Rapid antigen tests and subsequent PCR tests were positive for COVID-19, which meets requirements established by the Ministry of Children, Community and Social Services for declaring an outbreak in a congregate care setting.

Individuals we support and Sensity staff are following protocols for isolation. The identities of the people who tested positive are not being disclosed due to the confidential nature of the medical information.

We appreciate concerns for their health and well-being. We are relieved that symptoms have been minor.

All visits to and from the Welland site have been suspended effective immediately until further notice.

We appreciate the efforts of staff going above and beyond the call of duty to keep our individuals as safe as possible.
